Instructions for using the new service portal
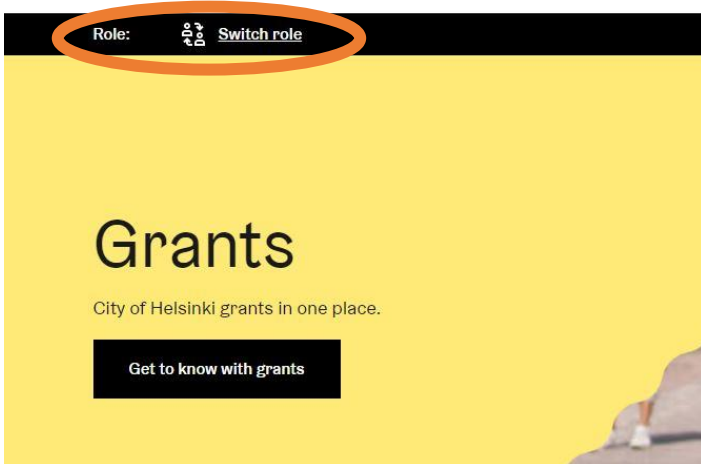

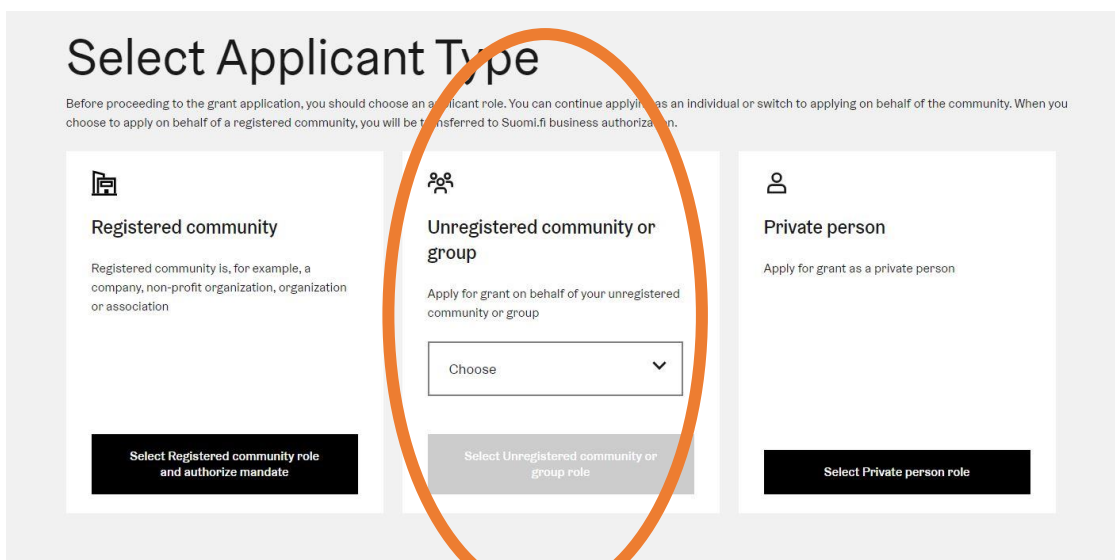

When you first log in to the new portal of the City of Helsinki with your online banking credentials, certification card or Mobile ID, you must create a Helsinki profile. Do this by answering the questions in the window that opens and by confirming your username with the code sent to your email inbox. In future, the username will be tied to your personal identity code and you can only log in with your online banking credentials, certification card or Mobile ID.

After logging in, you must select the appropriate role for the situation from the black bar under "Switch role."

When applying for a Sponssi grant, select "Unregistered community or group" as your role. If you are applying for a Sponssi grant for the first time or for a new group, select "Add new unregistered community or group" from the drop-down list and fill in the required fields. If you are applying for a Sponssi grant for an existing group, you can select it from the same drop-down list. Once you have made the selections, click the "Select Unregistered community or group role" button.

Once you have selected the role, you can proceed to fill in the grant application form. You can find forms under "Application search"

You can find the Sponssi application in the target group "Youth activities" under the name "Youth activity project grant Sponssi for youth activity groups."

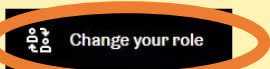

You can fill out the application form on the left side of the page under "Apply for grant." You can also preview the application without logging in under "Preview the application."

Keep in mind that if you have any questions about filling in the application, applying for a Sponssi grant or any other questions related to grants for youth services, you can contact the planners of our Partnership Unit at a low threshold. You can find the contact information for our planners here: Youth Services contact information
